BUS AND TRAIN TICKET BOOKING

HTML Code • CSS Code • Website Output

Project Overview

This beginner-friendly project contains a booking form for source, destination, travel date, passenger count and travel type. It also displays sample bus and train services, passenger details, seat numbers and ticket fares.

Files Required

index.html creates the webpage structure. **style.css** adds colours, spacing and responsive layout.

1. HTML Code (index.html)

```
<!DOCTYPE html>
<html>
<head>
    <title>Bus and Train Booking</title>
    <link rel="stylesheet" href="style.css">
</head>
<body>
    <!-- Navigation Bar -->
    <header>
        <h1>■ Travel Booking</h1>
        <nav>
            <a href="#">Home</a>
            <a href="#">Bus</a>
            <a href="#">Train</a>
            <a href="#">My Bookings</a>
            <a href="#">Login</a>
        </nav>
    </header>

    <!-- Booking Form -->
    <h2>Book Your Tickets</h2>
    <div class="booking">
        <form>
            <label>Source:</label>
            <input type="text" placeholder="Enter source city">
            <label>Destination:</label>
            <input type="text" placeholder="Enter destination city">
            <label>Travel Date:</label>
            <input type="date">
            <label>Passengers:</label>
            <input type="number" min="1" placeholder="Number of passengers">
            <label>Travel Type:</label>
            <select>
                <option>Bus</option>
                <option>Train</option>
            </select>
            <button type="button">Search Tickets</button>
        </form>
    </div>

    <!-- Available Services -->
    <h2>Available Services</h2>
    <div class="services">
        <div class="card">
            <h3>■ Express Bus</h3>
            <p>Route: Hyderabad to Vijayawada</p>
            <p>Departure: 8:00 AM</p>
            <p>Arrival: 2:00 PM</p>
            <p>Fare: ■500</p>
            <p>Rating: ■ 4.5</p>
            <p>Available Seats: 20</p>
            <button>Book Bus</button>
        </div>
        <div class="card">
            <h3>■ Express Train</h3>
            <p>Route: Chennai to Bangalore</p>
            <p>Departure: 9:00 AM</p>
            <p>Arrival: 3:00 PM</p>

    color: white;
    border: none;
    padding: 10px;
    margin-top: 10px;
    cursor: pointer;
    border-radius: 5px;
}

/* Available Services */
.services {
    display: flex;
    flex-wrap: wrap;
    justify-content: center;
    gap: 20px;
    padding: 20px;
}

.card {
    background-color: white;
    width: 250px;
    padding: 15px;
    border-radius: 10px;
    box-shadow: 0 0 5px gray;
    text-align: center;
}

/* Seat Selection */
.seats {
    text-align: center;
}

.seats button {
    background-color: green;
    width: 45px;
    height: 40px;
    margin: 5px;
}

.note {
    text-align: center;
```

```
    color: green;
}

/* Fare Table */
table {
    width: 80%;
    margin: 20px auto;
    border-collapse: collapse;
    background-color: white;
}

th, td {
    border: 1px solid gray;
    padding: 12px;
    text-align: center;
}

th {
    background-color: blue;
    color: white;
}

/* Footer */
footer {
    background-color: blue;
    color: white;
    text-align: center;
    padding: 15px;
}

/* Mobile Responsive */
@media (max-width: 600px) {
    nav a {
        display: inline-block;
        margin: 5px;
    }

    .services {
        flex-direction: column;
        align-items: center;
    }

    table {
        width: 95%;
        font-size: 12px;
    }
}
```

3. Website Output

Sample visual preview of the booking interface. The actual browser output will show the full layout when both files are saved in the same folder.

How to Run the Project

1. Create a folder named **Travel Booking**.

2. Create two files: **index.html** and **style.css**.

3. Paste the HTML code into index.html and the CSS code into style.css.

4. Save both files in the same folder.

5. Open index.html in a web browser to see the output.

Note: This is a front-end design. Search, booking, passenger submission and seat selection are sample interface elements. JavaScript and a backend are required for actual ticket bookings.
